Professional Summary

- Software Engineering student with hands-on experience in Java, Core Java, Spring Boot, RESTful APIs, and backend application development. Strong foundation in object-oriented programming, DBMS, and problem-solving, with experience building real-world Java-based projects.

Education

G. H. Raisoni College of Engineering and Management, B. Tech in Computer Engineering Jun 2023 – Present

- CGPA: 7.68 / 10 (up to Sem VI)

- **Relevant Coursework:** Data Structures, Computer Networks, DBMS, OOP, Operating Systems

Pratap College, HSC in Electronics and Telecommunication

2019 – 2021

- Percentage: 89.00%

Shri N.T. Mundada Global View School, SSC in General Studies

2019

- Percentage: 85.20%

Projects

Message Filtering Backend System

[Source Code](#)

- Built a backend application to classify and filter suspicious messages using RESTful APIs and Spring Boot
- Implemented Controller-Service-Repository pattern for clean, modular, and maintainable backend architecture
- Integrated Spring Data JPA for efficient database operations and entity management with MySQL
- Validated and debugged 15+ API endpoints using Postman to ensure reliable request handling
- Improved detection accuracy by designing domain-driven service logic with proper exception handling

URL Shortener Service

[Source Code](#)

- Developed a URL shortening service that converts long URLs into unique, shareable short links with redirect support
- Developed REST APIs supporting URL creation, redirection, and analytics with optimized short-code generation
- Designed APIs for URL creation, retrieval, and management following REST best practices (HTTP methods, status codes)
- Used MySQL for persistent storage with well-structured entity relationships and CRUD query optimization and Applied layered architecture (Controller → Service → Repository) and clean coding practices for maintainability

Technologies

Java & Backend Technologies: Core Java, Spring Boot, RESTful APIs, JDBC, Maven, MySQL

Web Development: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, TailwindCSS, Bootstrap

Tools & Platforms: Git, GitHub, Postman, VS Code, Eclipse

Core CS & Professional Skills: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Problem Solving, Analytical Thinking, Logical Reasoning, Teamwork, Communication Skills

Achievements

Solved **150+ DSA problems** across LeetCode and other coding platforms with strong understanding of arrays, strings, trees, and graphs.

Participated in multiple college-level hackathons and ideathons, with a project selected among the Top 25 teams in a National Level Ideathon 2025.
